11/11/09 10:00am

All team members present.

Dr. Darron Luesse present.

Update client on progress.

Topics Discussed:

- Demonstrated Filters library
  - include option to adjust thresholds
  - set different thresholds for different parts of image, individual seedlings, if possible
  - crop images to separate plates, seedlings before filtering

- Measure seedling thickness at each end and point of greatest curvature

- Ideally, the software will also work for adult plants

- May need to leave lab lights on to standardize light levels in images

On Agenda:

- Complete plan document

- Update website

Meeting adjourned 10:45am.
